Train the Trainer – Defensive Driving, 19-20 December 2019, NSC Hqs., Navi Mumbai

PERSPECTIVE

With the advancement of technology, the most developed projects undertaken along with the real estate are construction of highways and expressways. While new roads are being built, faster automobiles are being invented and produced in high numbers making road safety a crucial question. Conditions of roads across India are not hidden. In the last 50 years, India's automobile population has grown 170 times while the road infrastructure has expanded only nine times. The country’s vehicle population is over 5.5 crore and growing at a phenomenal rate of more than 25 lakh every year.

Road safety is emerging as a major social concern in the country. The analysis of road accidents in terms of causal factors reveals that drivers’ fault is the single most important factor responsible for accidents, fatalities and injuries. Drivers’ fault accounted for 77.5 per cent (3,85,806 accidents) of total accidents; 72.0 per cent (1,02,620) of the total number of persons killed and 78.2 per cent (3,99,911) of the total number of persons injured in road accidents during 2011. As per the research undertaken done by Ministry of Road Transport & Highways in 2014, 53 % of victims were in the age group of 15-34 yrs.

According to a survey by WHO, each year road traffic injuries take away lives of 1.2 million men, women, and children around the globe and injure many more. The death toll is on the higher side for the countries where pedestrians, motorcyclists and passengers are vulnerable and vehicles lack the safety norms, like India.

The Motor Vehicles Act, 1988 regulates all aspects of road transport vehicles in India. The Act provides in detail the requirement regarding licensing of drivers/conductors, registration of motor vehicles, control of motor vehicles through permits, special provisions relating to state transport undertakings, traffic regulation, insurance, liability, offences and penalties, etc. Strict enforcement of these traffic laws and compliance under the provisions under these rules and regulations and acts can reduce the road accidents. However there is need for mass awareness and effective training of relevant players on Road Safety. Recently Government of India has passed The Motor Vehicles (Amendment) Act, 2019 to improve Road Safety India

National Safety Council has scheduled this program to create awareness about road safety among participants and to develop training skills among them and become future trainer for Defensive Driving.

OBJECTIVES:

This Training Programme will help Participants to

- Understand Traffic Rules & Regulations.
- Acquire knowledge and techniques for defensive driving.
- Enhance positive attitude and behavior while driving.
