**Behaviour Based Safety Management**  (1 - 2 June 2020, West End Hotel, Mumbai)

**PERSPECTIVE**
Management practices like Engineering Revision, Instructions, Personal Adjustment and Discipline, etc. have resulted in improving Safety Standards and reducing unsafe situations and accidents. Now there is a need to find and apply newer methods to reach the target of zero accident. Keeping in view of the need, in the recent past safety professionals have developed a new approach known as “Behaviour Based-Safety”. This approach is based on successive years of research which showed that about 80% of accidents at the workplace are caused by unsafe behaviours.

It promotes pro-active & practical approach to genuinely help people to follow safe work practice on the job. In this approach Behaviour is considered as a base for improving safety performance because it is observable, definable & measurable also. Behaviours on the job are indicators of probable injuries and safety performance. The BBSM approach is different from traditional system approach and process approach, and focuses on one of the main aspects of safety problem i.e. At-Risk behaviour of people, which is a major cause of majority of accidents or injuries. The BBSM technique will serve as a tool to correct unsafe behaviour of people and achieve desired safe standard

**OBJECTIVE**
This program will enable participants to:

- Understand the concept and principles of BBSM to improve their safety performance
- Develop safety attitude
- Motivate employees to adopt safe practices at workplace
