Testing and Examination of Lifting Machines, Tackles, Pressure Vessels and Lifts & Hoists (15 - 17 June 2020, West End Hotel, Mumbai)

PERSPECTIVE

In factories, ports and construction sites, a number of operations and processes involve the use of lifting machinery, lifting tackles, chains, ropes, etc. for material handling. Pressure vessels are used in a variety of applications in both industry and the private sector. The pressure differential is dangerous and many fatal accidents have occurred in the history of pressure vessel development and operation. Improper selection, inadequate strength, patent defects and poor operating practices, etc., are some of the known causes for failure of the lifting equipment, as well as, pressure vessels which can result in fatal or serious injuries and also damage to equipment, material or other facilities. To prevent such unwanted events, it is essential that users of these equipments are familiar with the various safety requirements relating to their design, construction, testing, examination, maintenance and operation. These equipments are also required to be periodically examined and tested as prescribed under different statutes. Various Rules and Regulations under different statutes for the safe use of the lifting appliances and pressure vessels have laid down guidelines for safe operation.
